FINGERPRINT ACCESS CONTROL READER

Professional access control reader that absolutely meets your need!
Meet all kinds of access control needs like a glove.

- ☞ Standalone model, easy installation and user-friendly interface
- ☞ Compact and expert design, suitable for wall mounted
- ☞ High security level with fingerprint technology
- ☞ Multinational language display
- ☞ Fast image scan time/verification speed within 1 sec
- ☞ Verification modes: fingerprint only, password, fingerprint + password
- ☞ Multiple output: dry contact, lock control, Wiegand output to work with standard access controller for professional access control
- ☞ Multiple communication: TCP/IP, Mini USB and RS485
- ☞ Support latest version of software with time attendance report and analysis
- ☞ SDK available for software integration

- Good in price
- Stable in quality
- Practical and Useful

Item	Description
Sensor	Anviz Optical Sensor
LCD	128 x 64 Blue LCD
Register Method	Fingerprint, Password, FP+Password
Identification Method	1:1 1:N
Identification Time	<=1 Sec
Scan Area	15MM * 16MM
Resolution	500DPI
FRR	0.001%
FAR	0.00001%
Fingerprint Capacity	512/1000 (Optional)
Record Capacity	30000/50000 (Optional)
Standard Port	RS485, Mini USB and TCP/IP(optional)
Input	Wiegand 26
Output	dry contact , lock control, siren and Wiegand 26
Working Current	300mA
Power	Input 220V, Working voltage 12V
ESD Tolerance	>15000V
Temperature/Humidity	0°C~45°C/20%--80%
Display language	Simplified Chinese, traditional chinese, English, French and Spanish
Size	200 (h)x 90(w) x 35 (d)mm
Color	Black (can be customized)
